

CLINICAL BILLING POLICIES

Clients pay for services at the time service is rendered for audiological testing and speech evaluations. The Billing Specialist bills clients once a semester for speech and language therapy. Billing forms, with current transaction codes, are completed any time fees are charged. Failure to pay these charges can result in denial of further service.

The Billing Specialist will work with clients when payment of established fees (per interview) becomes difficult for the client. Every reasonable effort will be made to remedy the situation.

These policies are included in Appendix L. A fee schedule form is mailed to each client and explained as needed at the initial contact.
